## Stephen Goldberg, Legal Services of Northern CA, Honored by CDSS

# County Practices Result in California's Low CalFresh Participation Rate

On August 6, 2019, CDSS presented Stephen Goldberg, Regional Counsel of Legal Services of Northern California, with a CDSS Lifetime achievement award for his advocacy on behalf of his law-income clients. Stephen's biography follows.

Stephen is the classic polymath—he can do everything. Before he graduated from McGeorge, like any aspiring attorney, he competed in mock trial in high school and debated in college. He won a top attorney award in mock trial competition and a national economics writing contest.

After graduating from High School in Palo Alto in 1987, Stephen attended UC San Diego. Stephen majored in political science with minors in history and law and society. He graduated *cum laud* with honors. Thereafter Stephen attended McGeorge School of Law and graduated in 1994. He received the American Jurisprudence award for Federal Courts.

After law school, Stephen did not choose the career that one would expect. He dedicated his life's work to three things: public interest advocacy, training young minds, and music.

Stephen started his long and active law service in public interest law focusing on housing and public benefits. He elected to work for the Human Rights/Fair Housing Commission and Legal Services of Northern California as a staff attorney. He then worked for Lawyers for Civil Justice and the Coalition of California Welfare Rights Organizations for a short time before rejoining LSNC.

California is at the bottom of the barrel for CalFresh/SNAP participation in the United States. Only Utah, North Dakota and Wyoming have lower rates than California.

California spends millions on outreach and has the highest administrative costs in the country. Unlike most other states, California's 58 counties operate its CalFresh program. This results in 58 different policies and procedures to process CalFresh applications. Counties seem to be more interested in denying or closing Cal Fresh cases then authorizing benefits to starving families. It is not unusual for a child to go to bed hungry because their parents did not satisfy the county-specific procedural requirements. As the Table below demonstrates, over 50% of the April 2019 CalFresh applications were denied because of "procedural requirements" as opposed to the applicants being found ineligible. It is noteworthy that 78 % of the CalFresh denials in San Diego County are due to procedural denials. Similarly, the denial rate in San Francisco is 78%; Contra Costa, 77%; Orange, 74%; Riverside, 71%; Alameda, 74%; and Stanislaus, 63%.

"Procedural Reasons include such things as the household failed to complete the application process by not signing the application, not attending the interview, or failed to provide the requested verification."

CCWRO is an IOLTA funded support center serving IOLTA legal services programs in California. Types of Services Offered: Litigation, Co-Counseling, Fair Hearing, Representation, Consultation, Informational Services, Research Services, In-Depth Consultation and Welfare Training. Programs Covered: CalWORKs, Welfare to Work (WtW), Food Stamps, Medi-Cal, IHSS, CAPI, Child Care, General Assistance & Refugee/Immigrant Eligibility. All Rights

#### **Goldberg Honored** (cont'd from page 1)

As a representative for advocates statewide, Stephen has reviewed countless draft regulations, All County Notices, and All County Information Notices for the CalWORKs, CalFresh, IHSS, and RCA programs and provided invaluable input. After LSNC's regional counsel, Jodie Berger, became a SHD judge, Stephen became acting regional counsel and took Jodie's place as key advocate for public benefits.

Stephen frequently gives voice to the advocate community in the State Hearings Arena. Not only does he provide well-reasoned comments to proposed State Hearing regulations and procedures, but he also doggedly participates in sub-committee meetings such as SB320 and ACMS. Stephen is a well-respected and much sought after panelist at the SHD's Statewide Training Conference.

Stephen is also a life-long debater who selflessly coaches several high school debate teams, including McClatchy High School in Sacramento and Nevada Union High School in Grass Valley each week. Stephen had a cameo appearance in a documentary movie about high school debate in 2007. Each January, the Debate organization announces the national debate topic for the next year. During the summer, Stephen conducts research on the topic and develops pro and con arguments. Then, from September to June, Stephen travels to Grass Valley and McClatchy almost every week to help students prepare for the debate tournaments.

Stephen is the founder and president of the Sacramento Urban Debate League. After much work and politicking, he secured the National Catholic Forensic League National competition. The competition is held in Sacramento at multiple locations, including McClatchy High School, the Sacramento Convention Center, and Sacramento State University.

Stephen shares his love for the law by teaching courses to undergraduate paralegal students at American River College in landlord tenant law and administrative law. In this way, he can be Professor Goldberg. He is also a mentor to new attorneys at LSNC and through Legal Aid Association of California, a statewide organization for legal services programs.

Finally, if these activities were not enough, Stephen plays trombone in the Sacramento City College Jazz Band. The band holds at least four concerts during the school year. He practices trombone at his LSNC office at 11:00 P.M. and has been told not to give up his day jobs. At some point during each concert, he has a solo. He usually gives a heads-up for the concert an hour in advance in the hope that no one can come.

CCWRO is honored for Stephen's friendship and support.

#### County Practices (cont'd from page 1)

A failure to sign a CalFresh application is confusing since 58% of the CalFresh applications are filed in person while the remaining 42% are filed on-line. It is puzzling how an application could be submitted without being signed.

Another reason that counties deny an application is for "not attending" an interview. Frequently, missed interviews are the result of the county dictating the time and place of the appointment interview without considering whether the time and place is convenient for the applicants. Many times the applicant has to take the kids to school, or the doctor. Once the county sets the time and place for the appointment interview, it is difficult for the applicant to request a change in the appointment. In most counties, applicants do not have workers. Even if they have an assigned worker it is hard for the applicant to contact the worker. In counties that use call centers, it is nearly impossible for the applicant to change an appointment.

Counties frequently deny CalFresh benefits for failing to provide verification which is unnecessary to demonstrate eligibility. Counties often request a long list of documents from households to prove CalFresh eligibility. If the county doesn't receive the extraneous documents, the case will be closed.

Every month, counties are required to submit a **CF 296** report detailing the number of applications received, the number denied because the household is ineligible, and the number denied for procedural reasons.

Some counties, like Sacramento and Santa Clara simply do not submit the report. Nevertheless, CDSS continues to issue funding to non-reporting counties. What happens to CalFresh beneficiaries who do not report - benefits stopped summarily.

See page 3 for county-by-county application denials due to procedural (bureaucratic).

## **County CalFresh Victims of the Month**

#### Alameda County Denies Cal-Fresh Application For Not Keeping Future Appointment.

Ms. 10456838 applied for CalFresh on February 22, 2019. The February 25, 2019 notice denied the CalFresh application for not keeping the 7:30 AM CalFresh interview appointment scheduled for February 26, 2019. Ms. 10456838 filed for a state hearing indicating that she disagreed with Alameda County's decision. The Alameda County appeals unit reviewed the case and decided that the county acted appropriately and that any reasonable person would have completed the interview.

The county argued under oath that Alameda County was right to deny the application for not keeping the CalFresh appointment on February 26, 2019 at 7:30 am, even though the county mailed the denial letter on February 26, 2019. This is another example of the so-called "procedural reasons" that Alameda County uses to justify denying 74% of its CalFresh applications.

## CalFresh Punishes Beneficiaries Who Work In Los Angeles Coun-

**ty.** Ms. 104572890 is a beneficiary of the CalFresh program. In 2018, Ms. 104572890 worked and reported her employment on the SAR 7 but subsequently lost her job prior to December 2018. In January 2019, she received a new SAR 7. The county explained that she should put down all of the information for the report month that is on the upper right-hand side of the SAR 7. The January 1, 2019 SAR-7 asked:

"Did anyone get income from employment in the Report Month?  $\square$  Yes  $\square$  No

(If yes, complete the section below and attach proof).

The Report Month is listed at the top of the first page. List each job for each person who works.

If you need more space attach a separate piece of paper. Examples include baby-sitting, salary, self-employment, sick pay, tips. Etc. If you lost your job, attach proof."

Ms. 104572890 completed the SAR7 and reported no income because in the report month she had no earned or unearned income. On January 30, 2019 she received a notice of action stating that her CalFresh benefits would stop effective March 1, 2019 "because you did not submit a complete Semi-Annual Report (SAR-&) for December 2018."

Los Angeles County succeeded in punishing Ms. 104572890 for working and then not having a job in December 2018 to report. The county's termination of benefits was upheld by the State Hearing decision.

Los Angeles County Denies Cal-WORKs Application For Not Keeping An Unscheduled Face-To-Face Appointment. On January 31, 2019 Ms. 104570613 and her three children applied for CalWORKs in Los Angeles County. Ms. 104570613 completed her scheduled telephone interview on February 27, 2019. On April 19, 2019, Ms. 104570613 received a notice of action stating the denial of her ap-

(Cont'd on page 6)

**Los Angeles County** (Cont'd from page 5)

plication because she failed to complete the face-to-face interview. LA County never scheduled a face-to-face interview. After spending millions of dollars on a new computer system, the computer still denies applications for not keeping a face-to-face interview that was never scheduled. The other problem with this case is that the County denied the application took place on the 70th day and not the 45th day.

#### Orange County Uses Blocked Numbers to Complete CalFresh

**Interviews.** Given the proliferation of spam callers whose sole purpose is to defraud unsuspecting individuals, law enforcement and advocates recommend that unknown or blocked numbers should not be answered. In keeping with this advice, Ms. 1BBWS63 of Orange County programmed her phone to not accept calls from blocked numbers. Ms. 1BBWS63 applied for CalFresh at the age of 79 years. 211 helped her with the application and transmitted documents to the Orange County Welfare Office. She received a letter from her worker, Ms. Saylor informing her that she had a telephonic interview at 10 am. When she did not receive a call, she called the worker, Ms. Saylor, who then conducted the interview. During the interview she was informed that the worker had, in fact, called from a blocked number. As Ms. 1BBWS63 receives so many spam calls, her phone blocked the CalFresh worker's call. The county worker also said that the county never got the verification that was transmitted to them by 211. She had to mail another packet of the same information to Orange County.

# IHSS Call Center: Long Waits, Few Resolutions in LA County

The Los Angeles County Department of Public Social Services has provided CCWRO with 2019 call center statistics in response to a California Public Records Act Request. The records paint a picture of a time-consuming and unhelpful process for IHSS recipients and providers, matching the anecdotal reports of recipients and advocates.

**Excessive Wait Times.** Callers abandoned around half of all calls coming into the help line. This high abandonment rate probably results from the long wait times. The majority of abandoned calls occurred after more than 20 minutes in the wait queue. On average, callers waited 20-30 minutes to speak with a person.

Ineffective Self Service. Callers who tried using the automated Self Service system found this option particularly unhelpful. Only about 35% of callers resolved their issues or questions through Self Service. This means that 2 out of 3 callers wasted their time using Self Service and still had to wait 20-30 minutes to speak with a worker.

**Unprepared Workers.** Once the callers actually spoke to a helpline representative, they only had a 60% chance of speaking with a worker who was "ready" to address their issue. In 2019, social workers received about 30,000 calls per month and resolved only about 11,000 of those calls, a resolution rate of around 36%. Senior Clerks received about 70,000 calls per month and resolved about 40,000 of those calls, a 57% resolution rate. In July 2019, callers who waited the 20-30 minutes to speak to a human still had their issue resolved less than 50% of the time.

**Stagnant Improvement.** The statistics show little improvement over time from the beginning of 2019. In fact, July saw a notable uptick in wait times and abandoned calls. This highlights the problems with LA County's attempt to depersonalize and automate duties once performed by IHSS caseworkers familiar with individual case files and recipients. It suggests that the county has devoted insufficient training and resources to support and improve the call center.

### The Truth About Improper Payments - Mostly Caused by Food Stamp/ SNAP/ CalFresh Agencies and not beneficiaries

#### DATE: November 8, 2018 - AUDIT NUMBER: 27401-0003-11

- As **60** percent of **SNAP**'s payment errors are caused by **State** agencies, FNS works with States to strengthen the upfront eligibility determination process through system improvements, policy training, improved data matching and verification.
- The remaining **40 percent of payment errors are client caused**. FNS works with States to improve client education efforts and the clarity of notices to ensure application and reporting instructions are clearly conveyed.

Gil H. Harden, FNS Assistant Inspector General for Audit -Washington, D.C. - November 7, 2018
